

Improving the Safety for Cyclists - Proposed Milford to Takapuna Cycle Route

- We support the strategic citywide cycle network identified in North Shore City Council's **Strategic Cycle Plan (2003)**.
- The cycle strategy is aligned with the **New Zealand Transport Strategy (2002)** and the **Auckland Regional Cycling Strategy (2002)**.
- The cycle strategy aims to provide a **safe, convenient and enjoyable** cycling environment that meets the needs of cyclists.
- The council **encourages cycling**, both as a mode of transport and as a means of recreation.
- We the undersigned **support initiatives** to improve the **safety** for cyclists, **support cycle lanes** in general in North Shore City and **support the proposed cycle lanes** along Kitchener and Hurstmere Roads (this will form part of the East Coast Bays –Takapuna –Devonport cycle route).
- Cycling has many benefits, but these can only be realised if we have a **safe, convenient, and enjoyable** cycling environment.
